CONSTANTIN IORDAN

SENIOR SOFTWARE CONSULTANT / ENGINEER

Brasov, Romania │ costi.iordan@gmail.com │ +40.723.60.8360 │ www.constantiniordan.ro

SUMMARY

I love what I do - and I put my heart into every project I take on.

With 18 years of experience, I've built solutions that solve real-world problems in e-commerce, telecom, transportation, logistics, and tourism.

Clean, scalable, and thoughtfully designed software is my craft, and every project is an opportunity to make something that truly matters.

PROFESSIONAL EXPERIENCE

Senior software consultant/engineer Contractor   **Sep 2021 - Present**

- Deliver multiple Spryker e-commerce projects in automotive, sports events, and wholesale food industries as part of international teams.
- Plan, design and implement custom functionalities on Spryker platform. This includes third parties integrations, performance optimizations, catalog customization, custom admin interfaces and custom storefront themes.
- Rewrite React frontend for internal support application from a legacy code base to a modern tech stack using the latest technologies: React 19, React Material UI. This resulten in a more maintainable application with 100% unit test coverage using Jest and Testing Library React.
- Mentored developers into Spryker and PHP development.
- Created custom e-commerce platform using Laravel designed to meet the specific needs of the business. It includes advanced search capabilities, inventory management, catalog management, and real-time performance optimization using modern caching strategies. The platform is built using a modular monolith architecture, allowing for easy scalability and maintainability.
- Created custom rental management system with booking functionality, inventory tracking, and custom pricing and discounts. Built with Laravel Filament for admin panel efficiency and a custom frontend with vanilla css and vanilla JavaScript for a seamless user experience and simplicity.
